

Item data sheet - 3103817

2921 x 2325 (75x12.7) 4.0/4.0 - ZAL

MAKOMESH®

61.9kg

Item weight

>5.1kN

Weld shear force

>413MPa

Weld shear strength

Specifications

|                                |                                          |
|--------------------------------|------------------------------------------|
| Linewire length (mm)           | 2925                                     |
| Linewire diameter (mm)         | 4                                        |
| Linewire pitch (mm)            | 75                                       |
| Line wire overhang             | Trimmed                                  |
| Crosswire length (mm)          | 2329                                     |
| Crosswire diameter (mm)        | 4                                        |
| Crosswire pitch (mm)           | 12.7                                     |
| Cross wire overhang            | Trimmed                                  |
| Mesh aperture (mm)             | 71 x 8.7                                 |
| Wire tensile strength (MPa)    | 550-700                                  |
| Weld shear strength (MPa)      | >413                                     |
| Weld shear force (kN)          | >5.1                                     |
| Finish                         | Pre-Zinc Aluminium<br>(Al 10%+) 240 g/m2 |
| Weight (kg)                    | 61.9                                     |
| CO <sub>2</sub> emissions (kg) | 6.8                                      |

Features

|                                  |
|----------------------------------|
| Compliant with AS 2423-2002      |
| Compliant with EN 10223-4 : 2013 |
| Compliant with AS/NZS 4534:2006  |
| Made in Australia                |
